#### **IV. NEW BUSINESS (Discussion and Possible Action)**

- A. Transition from gas powered to electric gardening equipment - one more attempt to expedite.**

**Background:** In 1998, the City of Los Angeles banned the use of gas powered blowers within 500 feet of a residential property per [LAMC section 112.04\(c\)](#). In 12/2021 the [California Air Resources Board \(CARB\) required NEW small off-road engines, AKA leaf blowers, lawn mowers, etc to be zero emission in 2024](#). In June 2023, the Hancock Park Homeowners Association encouraged this transition by offering a \$100 rebate to their residents when they showed proof of purchase. However the use of gas powered gardening equipment continues. More information on this topic can be found in [LAist article](#) on 12/1/2025.

**Impact:** The noise produced by gas powered leaf blowers is dangerous: “The decibel range of gas-powered blowers exceeds noise safety standards established by the World Health Organization and the EPA.” Source: Center for Disease Control and Prevention. In addition the exhaust created by the two stroke engines contains PM 2.5 particulates, carbon monoxide, and other gases. •According to calculations in a [2021 fact sheet](#) by the California Air Resources Board, operating the “best-selling commercial **lawn mower**” for one hour results in as much ozone-forming emissions as driving a 2017 Toyota Camry about 300 miles. Even worse, operating the “best-selling commercial **leaf blower**” for just one hour results in as much ozone-forming emissions as driving a staggering 1,100 miles.

**Possible Solution:** The South Coast Air Quality Management Board (AQMD) offers [rebates](#) when consumers and commercial enterprises exchange their gas powered equipment for electric equipment. In addition, home and apartment owners can purchase electric equipment, at least leaf blowers, inexpensively now (\$150 - 250 depending on model).

**Discussion:** What actions would our Committee be interested in pursuing to help expedite this transition?
